

Multi-use splashguard masks

Based off of expert suggestions, we crated a light-weight, multi-use splashguard mask that offers high protection from air-born viruses. Our splashguard masks are comfortable to wear and do not disrupt your normal workflow.

Safety

- Offers protection from the front as well as the top and sides
- Foam top blocker allows for increased security even when bending over
- Shield can be shortened at the bottom with scissors if needed

Flexibility

- Adjust size of frame with elastic
- Glasses and other masks can still be worn

Sterilization

The shield can be sterilized using ethanol or soap water. The frame withstands heat up to 130°C and is compatible with most standard sterilization devices.

Production process

Manufactured on the RAPTOR 84X-Q laser sintering system by LSS
Prints up to 108 masks in 28 hours

Materials used

PA11 (black frame) and PA12 (white frame)

Both are light and strong polymers

Order your masks now!

Price per mask: 38 € excl. VAT

Minimum order quantity: 5 masks
